

The Physician's Prescription Formula

Formula I: Anti-Aging Nutraceutical

Formula I has been carefully synthesized to provide complete nutritional and immune system support to all tissues of your body. These antioxidant compounds have been clinically shown to help the body's repair processes repair all tissues from the level of the skin, right down to the level of your DNA!

Key Ingredients:

This twice daily formula delivers a broad array of vitamins, minerals, key antioxidants, essential fatty acids, and collagen building nutrients to keep all tissues of the body healthy.

Formula I contains Alpha-lipoic acid, L-carnosine which are potent antioxidants needed to protect cells and tissues from free radical damage, as well inhibit glycation which is a major cause of skin wrinkling and aging. Omega 3 & 6 Fatty Acids are also added to regulate the immune system and inflammatory response. Glucosamine sulfate and methylsulfonylmethane(MSM) supply bioavailable sulfur to help form healthy resilient connective tissues.

Also added to this formula are CoEnzyme Q10 and DHEA to provide energy through ATP activation and maximize cellular metabolism to ensure optimum organ function. To further maximize the body's ability to repair itself Uncaria tomentosa (AC-11) and Larch arabinogalactan have been added which have been shown to enhance immune system responsiveness as well as promote the body's natural DNA repair capacity. These components enhance natural DNA enzymatic repair mechanisms which helps counteract cell damage by oxidative stress resulting from environmental influences and aging. Arabinogalactan, derived from the larch tree stimulate macrophages and natural killer cells in your immune system resulting in a potent immunomodulating effect.

Formula II: Non- Stimulant Weight Loss Nutraceutical

Formula II offers patients a safe alternative to weight reduction and like Formula I offers complete nutritional support with the added bonus of helping boost the metabolism, block the absorption of carbohydrates, and help the body metabolize fat, all without the side effects of herbal or chemical stimulants!
